STONE GREY	SCHLUTER	N/A	N/A	INSTALLER TO DETERMINE QUANTITY NEEDED.

*Finish Schedule

adding tags to your drawings

when things don't go as planned

***I recently fired a client who kept changing her mind after we had already "finalized" the finish schedule, redrawn the elevations and sent updates to the builder. Revision after revision after revision. I would get her approval that this selection was going to be the "Final" selection and then she would call the builder and get the names of more showrooms she could go to. I knew at that point I needed to step aside. I knew with all the miscommunication going to the builder and trades, it was not going to be a good situation.
